

Miniature American Shepherd Club of the USA, Inc

**Most Versatile Miniature American Shepherd
Conformation Scoring**

(approved by the MACUSA Board – June 13, 2012)

Armband Number: _____

Circle as applicable ► Dog Bitch Altered

<p>Proportion and Substance - Proportion: Measuring from the point of the shoulder to the point of the buttocks and from the highest point of the shoulder blade to the ground, he is slightly longer than tall. Substance: Solidly built with moderate bone in proportion to body height and size. Structure in the dog reflects masculinity without coarseness. Bitches appear feminine without being slight of bone.</p>	<p>_____ / 15</p>
--	-------------------

<p>Head - The head is clean-cut, dry, and in proportion to the body. Expression: Alert, attentive and intelligent. May express a reserved look and/or be watchful of strangers. Eyes: The eyes are set obliquely, almond shaped, neither protruding nor sunken and in proportion to the head. Acceptable in all coat colors, one or both eyes may be brown, blue, hazel, amber or any color combination thereof, including flecks and marbling. The eye rims of the reds and red merles have full red (liver) pigmentation. The eye rims of the blacks and blue merles have full black pigmentation. Ears: Are triangular, of moderate size, set high on the head. At full attention they break forward and over, or to the side as a rose ear. Severe Fault: Prick ears and ears that hang with no lift. Skull: The crown is flat to slightly round and may show a slight occipital protuberance. The width and the length of the crown are equal. Stop: The stop is moderate but defined. Muzzle: The muzzle is of medium width and depth and tapers gradually to a rounded tip without appearing heavy, square, snipy, or loose. Length is equal to the length of the crown. Planes: Viewed from the side, the muzzle and the top line of the crown are slightly oblique to each other, with the front of the crown on a slight angle downward toward the nose. Nose: Red merles and reds have red (liver) pigmentation on the nose leather. Blue merles and blacks have black pigmentation on the nose leather. Fully pigmented noses are preferred. Noses that are less than fully pigmented will be faulted. Severe Fault: 25-50% un-pigmented nose leather. Bite: A full complement of teeth meet in a scissor bite. Teeth broken, missing or discolored by accident are not penalized.</p>	<p>_____ / 15</p>
---	-------------------

<p>Neck, Topline, and Body - The overall structure gives an impression of depth and strength without bulkiness. Neck: The neck is firm, clean, and in proportion to the body. It is of medium length and slightly arched at the crest, fitting well into the shoulders. Topline: The back is firm and level from the withers to the hip joint when standing or moving. Loin: The loin is strong and broad when viewed from the top. Croup: The croup is moderately sloped. Body: The body is firm and well conditioned. Chest and Ribs: The chest is full and deep, reaching to the elbow, with well sprung ribs. Underline: The underline shows a moderate tuck-up.</p>	<p>_____ / 16</p>
---	-------------------

<p>Forequarters - The forequarters are well conditioned and balanced with the hindquarters. Shoulders: Shoulder blades (scapula) are long, flat, fairly close set at the withers, and well laid back. Upper arm: The upper arm (humerus) is equal in length to the shoulder blade and meets the shoulder blade at an approximate right angle. The forelegs drop straight and perpendicular to the ground. Elbow: The elbow joint is equidistant from the ground to the withers. Viewed from the side, the elbow should be directly under the withers. The elbows should be close to the ribs without looseness. Legs: The legs are straight and strong. The bone is oval rather than round. Pasterns: Short, thick and strong, but still flexible, showing a slight angle when viewed from the side. Feet: Oval shaped, compact, with close-knit, well-arched toes. Pads are thick and resilient; nails are short and strong. The nails may be any color combination. Dewclaws should be removed.</p>	<p>_____ / 14</p>
--	-------------------

<p>Hindquarters - Width of hindquarters is approximately equal to the width of the forequarters at the shoulders. Angulation: The angulation of the pelvis and upper thigh (femur) mirrors the angulation of the shoulder blade and upper arm, forming an approximate right angle. Stifle: Stifles are clearly defined. Hock: The hocks are short, perpendicular to the ground and parallel to each other when viewed from the rear. Feet: Feet are oval, compact, with close knit, well arched toes. Pads are thick and resilient; nails are short and strong. The nails may be any color combination. Rear dewclaws should be removed.</p>	<p>_____ / 10</p>
---	-------------------

<p>Coat - Moderation is the overall impression of the coat. Hair is of medium texture, straight to wavy, weather resistant, and of medium length. The undercoat varies in quantity with variations in climate. Hair is short and smooth on the head and front of the legs. The backs of forelegs and breeches are moderately feathered. There is a moderate mane and frill, more pronounced in dogs than in bitches. Hair may be trimmed on the ears, feet, back of hocks, pasterns, and tail, otherwise he is to be shown in a natural coat. Untrimmed whiskers are preferred. Severe Fault: Non-typical coats.</p>	<p>_____ / 5</p>
---	------------------

<p>Color - White on the head does not predominate, and the eyes are fully surrounded by color and pigment. Red merles and reds have red (liver) pigmentation on the eye rims. Blue merles and blacks have black pigmentation on the eye rims. Ears fully covered by color are preferred. Severe Fault: White markings covering over 25% of an ear.</p>	<p>_____ / 5</p>
---	------------------

<p>Gait - Smooth, free, and easy; exhibiting agility of movement with a well-balanced, ground-covering stride. Fore and hind legs move straight and parallel with the center line of the body; as speed increases, the feet, both front and rear, converge toward the center line of gravity of the dog, while the back remains firm and level. When traveling at a trot the head is carried in a natural position with neck extended forward and head nearly level or slightly above the topline.</p>	<p>_____ / 20</p>
---	-------------------

Penalties for Breed Standard Disqualifications – circle all penalties that apply and subtract from score	Penalty
Under 14 inches and over 18 inches for dogs; under 13 inches and over 17 inches for bitches.	-10
Over 50% un-pigmented nose leather.	-10
Undershot or overshot bite.	-10
Other than recognized colors. White body splashes, which means any conspicuous, isolated spot or patch of white on the area between withers and tail, on back, or sides between elbows and back of hindquarters.	-10
Undescended testicles or testicles not present (unless altered)	-10
